A BEHAVIOURAL LENS ON DISCLOSURES

15.B.2 Consider an E box with consumers w/ L-D utility:

$$U_1(x_{11}, x_{21}) = x_{11}^\alpha x_{21}^{1-\alpha} \quad U_2(x_{12}, x_{22}) = x_{12}^\beta x_{22}^{1-\beta} \quad (w_{11}, w_{21}) \gg 0$$

Solve for equilibrium price ratio + allocations.

How do these change w/ a differential Δ in w_{11} ?

consumer 1: $\max_x U(x) = x_{11}^\alpha x_{21}^{1-\alpha} - \lambda [p_1 x_{11} - p_2 x_{21} - p w_1]$

$$\text{FOC: } \partial U / \partial x_{11} \propto \alpha x_{11}^{\alpha-1} x_{21}^{1-\alpha} - \lambda p_1 = 0$$

$$\partial U / \partial x_{21} \propto (1-\alpha) x_{11}^\alpha x_{21}^{-\alpha} - \lambda p_2 = 0$$

$$\frac{\alpha x_{11}^{\alpha-1} x_{21}^{1-\alpha} = \lambda p_1}{(1-\alpha) x_{11}^\alpha x_{21}^{-\alpha} = \lambda p_2} \Rightarrow \frac{\alpha}{(1-\alpha)} x_{11}^{-1} x_{21} = \frac{p_1}{p_2} \Rightarrow x_{21} = \frac{p_1}{p_2} x_{11} \left(\frac{1-\alpha}{\alpha} \right)$$

$$p_1 x_{11} + p_2 x_{21} - p w_1 \Rightarrow p_1 x_{11} + p_2 \left[\frac{p_1}{p_2} x_{11} \left(\frac{1-\alpha}{\alpha} \right) \right] - p w_1$$

$$p_1 x_{11} \left[\frac{1}{\alpha} \right] = p w_1 \Rightarrow x_{11} = \frac{\alpha p w_1}{p_1}, \quad x_{21} = \frac{(1-\alpha) p w_1}{p_2}$$

Themes

- 1) Heuristics versus deliberation
- 2) Information overload
- 3) Limited attention → Passive acceptance
- 4) More disclosure \neq More comprehension \neq Better use of information
- 5) Format matters
- 6) Disclosure could have perverse effects
- 7) Effective disclosure = Simplicity + Relevance + Customizability + Timing
